

Hey Ana,

I am currently visiting Easter Islands. It is spectacular here! The smell of the Pacific Ocean is a little hard to get used to, but I'm enjoying my stay so far.

I've learned so much already, there is over 600 giant statues! The megaliths are as high as 13 meters and weight 37 tonnes! Can you believe that they were carved approximately 200 years ago, that's old! I'm starting to wonder what those writings and carvings meant? I think its some foreign language of something, well that's what the tour guide said. I have to get going now, they're allowing us to take pictures of the statues now, finally.

Write back soon,

*Breanna Machado*
